New Case Study Examines Use of Cypress at Live Oak Bank

PITTSBURGH, May 28, 2014 – The Southern Cypress Manufacturers Association has published a new case study that details the use of cypress at the new Live Oak Bank headquarters in Wilmington, North Carolina. The 36,000-square-foot building features cypress as exterior siding and soffits, as well as interior ceilings and custom millwork. [Click here](#) to download a copy.

Architect Laura Miller, principal at LS3P Architects in Wilmington, said, “Cypress was the perfect solution, not only due to its local availability, but also its natural durability and beautiful aesthetic qualities. Ultimately, we were able to use traditional building materials in a modern way, while optimizing views and daylighting. The result is spectacular.”

Download the case study at www.CypressInfo.org.

The Southern Cypress Manufacturers Association is a non-profit organization dedicated to the promotion of cypress building products to trade professionals and consumers. For more information, visit www.CypressInfo.org.
